

THE BUSINESS CLOUD

Eclipse UC convergent platform delivers advanced PBX and Unified Communications features to businesses of any size, transparently, over any network and on any terminal. This is what makes the Eclipse UC offering so powerful.

Whether you work from home, on the road, at your desk, or from the boardroom, Eclipse UC has your collaboration requirements covered.

Expandable

Easily expandable to every market tier from SMB to enterprise with easy to deploy packages based on the modern workforce requirements.

Locally Hosted

Eclipse UC is a locally hosted solution with readily available support teams able to assist with any and all technical related queries and maintenance requirements.

API Integration

Full open API integration into your work CRM and ERP systems allowing seamless collaboration of all your communication requirements.

Full UC & C

A truly unified communications platform integrating all elements of your business communication needs, from mobility and VC to voicemail and auto attendant, we've got it all.

Maximize Affordability

Eclipse UC is very competitively priced while still offering all the advanced business grade features of competing platforms at a much more affordable price.

Globally Trusted

Powered by Centile, a globally tried and trusted platform, our solution offers you the same internationally recognised high standards and efficient user driven experience.
